

Battery Recycling

Recycling batteries protects human health and our environment from heavy metal contamination. Used batteries are collected by Environmental Health and Safety (EH&S) for recycling.

Some types of batteries recycled by EH&S include:

- Alkaline
- Mercury
- Nickel-Cadmium (Ni-Cd)
- Silver Button
- Carbon-Zinc
- Lithium Ion
- Nickel Metal Hydride (Ni-MH)
- Lead Acid (Pb)

Recycling Procedures

Interoffice mail your batteries to EH&S. Call EH&S at (949) 824-6200 and ask for a battery recycling bag. Place your used batteries inside of the pre-labeled bag and return it to EH&S via interoffice mail.

Used batteries must be transferred to EH&S for recycling within 9 months of being generated.
