

UC Irvine Sewer System Management Plan (SSMP)

UC Irvine is developing and implementing a Sewer System Management Plan (SSMP) pursuant to State Water Resources Control Board Order 2006-0003, Statewide General Waste Discharge Requirements for Sanitary Sewer Systems. The goal of the UCI SSMP is to provide a plan and schedule to properly manage, operate, and maintain all parts of the sanitary sewer system. This will help reduce and prevent sanitary sewer overflows (SSOs), as well as mitigate any SSOs that do occur. The development process began in summer 2007 and it is expected to be complete by August 2009. The duration of the implementation is unknown at this time.

The SSMP Development Plan and Schedule are available for review at the UCI Environmental Health & Safety Office, 4600 Health Sciences Road, Irvine, CA 92697-2728 during normal business hours. Interested parties can contact Dick Sun at (949) 824-6200 or dick.sun@uci.edu for additional information.

Sanitary Sewer System Performance

Effective January 2007, UC Irvine will report SSO's electronically to the California Integrated Water Quality System (CIWQS). The electronic SSO data, as well as information regarding regulatory actions, is available at: www.waterboards.ca.gov/ciwqs/publicreports.html
