Occasionally University Housing staff members will encounter a situation where blood, vomit, urine or feces are involved. Unless the area is deemed a crime or trauma scene (e.g., homicide, suicide, major accident, workplace violence, etc.), the waste generated can be managed as regular trash. The chart below will assist you in managing bodily fluid waste appropriately.

- **Blood, Vomit, Feces or Urine Waste**
  - Dispose of waste in the regular trash.

- **Sharps Waste**
  - Place the needle or syringe in a sharps container and call EH&S x46200 for a pickup.

- **Crime or Trauma Scene Waste**
  - Contact UCIPD x45223 and/or EH&S x46200 as appropriate.
