### Use For:
- **Chemical Waste**: Use with secondary containment.
- **Solid Chemical Waste**: Solid chemical waste.
- **Chemically Contaminated Sharps**: Contaminated hypodermic needles, razors, scalpel blades, etc.
- **Solid Biohazardous Waste**: Infectious agents, bacteria, viruses, spores, etc.
- **Pathology Waste**: Carcasses, recognizable body parts, transgenic animals, etc.
- **Biohazardous Contaminated Sharps**: Contaminated or non-contaminated hypodermic needles, razors, scalpel blades, etc.
- **Clean Broken Glass**: Clean broken beakers, flasks, graduated cylinders, test tubes, etc.
- **Fine Metal Shavings and Powder From Machining**: Fine metal shavings and powder, soiled rag with fine metal shavings or powder, etc.

### Examples:
- **Methanol, formaldehyde, solid chemical powders, silica gel, etc.**
- **Contaminated debris, gloves, bottles, glassware, Eppendorf tubes, ethidium bromide gels, etc.**
- **Contaminated hypodermic needles, razors, scalpel blades, etc.**
- **Infectious agents, bacteria, viruses, spores, etc.**
- **Carcasses, recognizable body parts, transgenic animals, etc.**
- **Contaminated or non-contaminated hypodermic needles, razors, scalpel blades, etc.**
- **Clean broken beakers, flasks, graduated cylinders, test tubes, etc.**
- **Fine metal shavings and powder, soiled rag with fine metal shavings or powder, etc.**

### Dispose within:
- **Liquid or Solid Chemical Waste**: 6 months
- **Solid Chemical Waste**: 6 months
- **Chemically Contaminated Sharps**: 6 months
- **Solid Biohazardous Waste**: 7 days
- **Pathology Waste**: 7 days
- **Biohazardous Contaminated Sharps**: 7 days of being 2/3 full
- **Clean Broken Glass**: Not applicable
- **Fine Metal Shavings and Powder From Machining**: 6 months

### Where to get containers:
- **Self Service Empty Container Locations**
- **Call EH&S (949) 824-6200**
