Best Management Practices (BMPs)

Hazardous Materials
Use, Handling and Storage

<table>
<thead>
<tr>
<th>Pollutants of Concern:</th>
<th>Any material defined as hazardous under federal, state or local laws and regulations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Purpose:</td>
<td>Proper handling, use and storage minimizes or eliminates discharge of these materials to the storm drain system</td>
</tr>
<tr>
<td>Application:</td>
<td>Any where hazardous materials are handled, used, delivered and stored</td>
</tr>
</tbody>
</table>
| Limitations:          | • Storage areas must meet all federal, state and local laws, regulations and requirements  
                         • Materials must be protected from the elements  
                         • Must provide spill protection for all materials |
| Practices:            | • Maintain chemical inventories and annual usages if applicable  
                         • Maintain Safety Materials Data Sheets on all materials handled  
                         • Store all materials in original containers unless damaged  
                         • All materials must be properly labeled according to original manufacturer’s label  
                         • Use materials only where and when needed to complete the job  
                         • Do not leave containers opened while unattended  
                         • Substitute hazardous materials with Environmentally Safe substitutes when possible  
                         • Notify EH&S if materials are spilled or released into the environment |
| Inspection & Maintenance: | • Routinely check to make sure containers are in good condition and are stored adequately |
