University of California, Irvine
COVID-19 Prevention Plan
Revised: January 27, 2021
University of California, Irvine
COVID-19 Prevention Plan

Revised: January 27, 2021

Summary: The University of California, Irvine’s COVID Prevention Plan addresses the Cal/OSHA emergency COVID-19 Prevention Regulation, 8CCR 3203.

1. Identification and correction of COVID-19 hazards
2. Investigation of COVID-19 positive cases, including communication to potentially exposed employees
3. COVID-19 Training
4. Physical Distancing (by at least 6 feet) Methods
5. Face Coverings
6. Engineering controls, administrative controls, and PPE
7. Keep potentially exposed employees away from the workplace
8. Multiple and major COVID-19 infections and outbreaks
9. COVID-19 prevention practices and documentation for employer-provided housing
10. Employer-provided transportation to and from work

1. Identification and correction of COVID-19 hazards
The campus identifies and evaluates COVID-19 hazards and correction of hazards by conducting periodic COVID-19 related inspections. EHS staff perform COVID-19 related spot checks in research spaces where hazardous chemicals are used, University Lab Animal Research (ULAR) locations, Facilities Management (FM), Design and Construction Services (D&CS), contractors/vendor construction work, Dining Services, and Student Housing units. Campus bargaining units and unions have been notified of EHS efforts to identify COVID hazards through HR communications. Data is collected on the results of the COVID-19 spot checks and presented to management and Senior Leadership.

EHS also follows-up on submitted COVID-19 safety concerns from campus, including COVID-19 related whistleblower complaints. Leadership of these units are notified of hazards and unsafe behaviors and expected to resolve them by communication to unit employees. Repeated COVID-19 safety concerns are elevated to campus Senior Leadership.

Campus units working on campus have submitted Return to Work plans, and have completed a Risk Assessment, Protection, and Monitoring Plan. The submitted plan includes a physical assessment of the work space performed by EHS. Non-Research plans are submitted to the Campus Recovery Implementation Team (CRIT) for approval. Research plans are submitted to the Office of Research for approval.

In addition to following the regulations set forth by Cal/OSHA, UCI frequently consults other regulatory agencies (i.e. California Department of Public Health (CDPH), Centers for Disease Control (CDC), Orange County Health Care Authority (OCHCA)) for changes and guidance on COVID-19 related information. UCI
also references the California State Guidance for Institutes of Higher Education document for additional information.

2. **Investigation of COVID-19 positive cases, including communication to potentially exposed employees**

   Investigation of COVID-19 cases at UCI, including giving notice to all potentially exposed employees within one business day to meet compliance with AB 685, follows the following process:

   Positive or suspected COVID-19 case notifies UCI in one of several methods:
   
   a. Through Human Resources, form available at: [UCI Human Resources](http://www.ehs.uci.edu)
   b. By contacting the COVID-19 Response Center at [covid19@uci.edu](mailto:covid19@uci.edu) or (949) 824-9918
   c. By notifying their supervisor of their status

   After the form is completed by the employee, their supervisor, or HR on behalf of the employee, notification is sent to the Center of Occupational and Environmental Health (COEH), Contact Tracing, and EHS ([safety@uci.edu](mailto:safety@uci.edu)).

   Student employees are directed to visit the Student Patient Portal and complete the "COVID-19 Responder Screening Request," or contact UCI's Student Health Center (SHC) at 949-824-3870 to report a case.

   EHS assigns the positive case to an EHS representative for investigation, who determines and recommends control measures that should be taken in the work place. Investigation questions are completed by EHS staff:

   - **Employee Name:**
   - **Title:**
   - **Email:**
   - **Department:**
   - **Supervisor Name:**
   - **Supervisor Email:**
   - **Supervisor Phone:**

   Essential Worker: Critical worker identified under the department’s continuity of operations plan whose work cannot be completed remotely for any duration of their work hours.
   - ☐ Yes
   - ☐ No

   Represented Worker
   - ☐ Yes
   - ☐ No

   Case Last Day On-Site:
   - Date of Onset:
   - Description of Incident:
   - Potential Route of Exposure:
Supervisor Response:

Check all control measures in place:

- Physical Distancing
- Signage
- Communications
- Barrier/Space Assessment
- Training
- Face Covering
- Other

Covid-19 Returning to Campus Training

☐ Yes
☐ No

EHS Recommendations

- Physical Distancing
- Signage
- Communications
- Barrier/Space Assessment
- Training
- Face Covering
- Other

UCI Contact Tracing follows the attached flowchart after being notified of a positive COVID-19 case:

UCI COVID 19 Contact Tracing
Staff and Faculty Flow Chart

[Flowchart image]

Employee tests positive as indicated in a test by an outside provider

Employee indicates symptoms on check-in

Employee tests positive on check-in

Employee reports symptoms to supervisor

Employee tests through Asymptomatic Testing

Overseer and Director from the COVID-19 Response Team/Doctor

CT Interview Case

Close Contacts?

Yes

No

CT gives info to OCHCA

CT Interview Case

Close Contacts?

Yes

No

CT notifies ODEH and completes close work contact form which are sent to ODEH

ODEH orders test 5-7 days after quarantine begins

ODEH releases from quarantine after 14 days if test is negative

ODEH updates log

ODEH updates log

[Flowchart steps and decisions]
Written notification, required from the positive COVID-19 case which resulted in COVID-19 exposed workplace(s), applies to all campus non-healthcare workers including students, staff, faculty/academics, and employers of contractors is via UCI Campus’s COVID-19 web page. This information is communicated to all UCI employees through a daily digest email, sent out Monday through Friday. As a result of contact tracing investigations, Contact Tracing provides a list of exposed workplaces to Strategic Communications and maintains records for five years, according to UCOP policy.

The daily email message from Strategic Communications includes the following information:

- A list of exposed workplaces (i.e. work locations)
- A statement that any employee who may have had a COVID-19 exposure was contacted by Contact Tracing, and if they did not receive it, then they should not be concerned.
- Links to employee COVID-19 benefits and campus disinfection protocols

Individual employee and union (if applicable) written notification for anyone who may have had a COVID-19 exposure applies to all campus employees. Communication is in the form of a written letter to employees deemed as having close contact to a positive COVID-19 case. As a result of contact tracing case investigation, Contact Tracing provides information (employee names, UCInetIDs, case number (if available), date of exposure, and work locations of exposure) for employees who had a potential COVID-19 exposure to Employee Workforce Relations. Contact Tracing will maintain these records for five years based on UCOP policy.

Employee Workforce Relations drafts a letter that includes the employee’s payroll title and migrate Contact Tracing’s information into the email. The document will also include the reason for testing, possible consequences of the test, decontamination process, benefits, and helpful information and resources.

Employee Workforce Relations uses an email letter template (i.e. C19 AB 685 Individual Employee Exposure Email) to add the employee’s Payroll Title and migrate Contact Tracing’s information into the email. The document will also include reason for testing, possible consequences of the test, decontamination process, benefits, and helpful information and resources.

Employee Workforce Relations will also determine if the employee is represented, email the employee, and copy the union representative, if applicable. If an email address is not provided, Employee Workforce Relations will manage the case by exception. Employee Workforce Relations will maintain these records for five years, based on UCOP policy. Contract Tracing will use the process above for any employee who tests positive.

Contractor/Vendors Communication:
All contractors/vendors are notified via email about UCI’s dashboard which contains locations where there may be a potential COVID-19 exposure. EHS sends the following email out to all contractors/vendors Monday through Friday (business days):

Dear Contractor/Vendor providing services to UCI:

Per California Assembly Bill (AB) 685, effective January 1, 2021, please see the following information on potential COVID-19 exposure at UCI:  
https://uci.edu/coronavirus/dashboard/index.php#workplace-exposure

Additionally, if any of your employees who have worked on campus have tested positive for COVID-19, please provide the following details by sending an email to covid19@uci.edu or call (949) 824-9918:

- Dates on campus, listed by day, during positive individual’s infectious period
- Campus locations where the positive individual worked during their infectious period
- Any UCI employees or students with whom the positive individual may have had contact during their infectious period

We expect the positive individual(s) to refrain from coming on the UCI campus until they are released to work as directed by their health care professional.

If you have any questions regarding this notification, please contact covid19@uci.edu or call (949) 824-9918.

Regards,

John Sterritt
Executive EHS Director

Contractors are instructed to contact the Coronavirus Response Center (covid19@uci.edu or at (949) 824-9918) with the names of any UCI persons who may have been exposed by a contractor with a confirmed COVID-19 positive case. This information will contain the names of the affected individuals, infectious periods, and campus work locations. The Coronavirus Response Center immediately emails the contractor’s information to Contact Tracing. Contact Tracing will obtain the applicable information and identify any campus locations of potential COVID-19 exposure and communicate to Strategic Communications for inclusion in the campus COVID-19 dashboard.

3. COVID-19 Training

COVID-19 training content has been developed and is available in an online course for UCI campus employees: Returning to Campus Training // Environmental Health & Safety // UCI
Campus employees are required to take this training as directed by UCI’s Executive Directive on COVID-19 training: [UCI20_executivedirective-training-08-25-20.docx.pdf](https://www.ehs.uci.edu/public-health/covid-19/signage.php#pdr)

Returning to Campus COVID-19 training content includes:

- What COVID-19 is, how it spreads and how to identify the symptoms;
- The importance of healthy hygiene practices, including but not limited to hand washing, and routine surface cleaning;
- The importance of physical distancing, and how to identify visual cues on campus;
- UCI’s policy on face coverings and why it is important to use them;
- UCI’s Working Well program, which helps employees identify potential COVID-19 symptoms on a daily basis and provides guidance on seeking medical care;
- Who to contact in the event of a positive case;
- Websites and additional resources to help keep employees up-to-date on UCI’s policies regarding COVID-19; and
- Supplemental modules for employees working in specific job functions at UCI.

**Aerosol Transmissible Disease Training**

Aerosol Transmissible Disease (ATD) training is provided to any UCI employee who performs cleaning and disinfecting activities related to COVID-19 control measures. This training is conducted by EHS staff. ATD training and Bloodborne Pathogens (BBP) training is also provided to all Student Health Center employees. This training is conducted by EHS staff and is also available in UC Learning Center.

4. **Physical Distancing (by at least 6 feet) Methods**

UCI has instituted telework as a primary means to physically distance employees. Campus wide methods to physically distance employees have been put into place, including plexiglass barriers and floor markers to indicate proper separation. Maximum occupancy for campus elevators have been determined based on elevator size and signs have been placed in elevator waiting areas.

Additional signs are available for units to post in their workplace: [https://ehs.uci.edu/public-health/covid-19/signage.php#pdr](https://ehs.uci.edu/public-health/covid-19/signage.php#pdr)

5. **Face Coverings**

UCI offers and provides face coverings to all employees and provides accommodations for employees who cannot medically wear one. The UCI Logistics Team has stocked face coverings for all UCI employees and EHS and Facilities Management distribute to campus departments and as requested. Additionally, HR has created a process to evaluate medical accommodations and provide an alternate face covering that is non-restrictive.

Information on how to obtain a face covering is provided on EHS’ webpage:

In order to assist Campus departments in providing face coverings as we ramp-up operations, EH&S will be scheduling cotton face covering pick up services on the days and times listed below. Once you receive an email confirmation, please go to EHS to pick up the face coverings. When picking up supplies, please adhere to appropriate physical distancing practices.
How: Supervisors should email a request with the department name and number of employees to safety@uci.edu. EHS will respond with a pick up day and time for the request.

Where: Environmental Health and Safety Department (4600 Health Sciences Road – Building 41 on the campus map)

Dates: Monday through Friday, 8:00 a.m. – 12:00 p.m.

6. Engineering controls, administrative controls, and PPE

UCI implements COVID-19 control measures that follow the hierarchy of controls: engineering controls, administrative controls, and personal protective equipment (PPE).

Engineering controls currently in place:

- Facilities Management maintains campus buildings with appropriate Minimum Efficiency Reporting Value (MERV)-rated filter and maintains Heating Ventilation and Air Conditioning (HVAC) systems with the appropriate air changes per hour and replaces filters, as necessary.
- Plexiglass partitions and barriers have been provided to campus units after performing a physical space assessment and reviewing return to work plans for their units.

Administrative controls currently in place:

- Enhanced cleaning occurs multiple times a day, in all occupied campus spaces, by custodial employees in Facilities Management, Student Housing, Campus Recreation, Child Care Services, Dining Services, and Student Health Center.
- Cleaning procedures have been established for all frequently touched surfaces, with specific procedures established for general spaces, laboratory spaces, Student Housing, and Dining Services: [https://ehs.uci.edu/public-health/covid-19/cleaning.php](https://ehs.uci.edu/public-health/covid-19/cleaning.php)
- Hazard assessments have been conducted for all cleaning activities. Appropriate training and PPE recommendations have been shared with these departments.
- Proper handwashing information is provided to the campus community and hand sanitizer stations are located in every building.
- For positive COVID-19 cases, decontamination is based on the last day the individual was on site and how long the space can be left unoccupied. UCI follows CDC recommendations on disinfection after a space was occupied by a COVID-19 positive individual: [https://www.cdc.gov/coronavirus/2019-ncov/community/disinfecting-building-facility.html](https://www.cdc.gov/coronavirus/2019-ncov/community/disinfecting-building-facility.html)
- Tools and equipment that must be shared between employees are cleaned and disinfected between users.
- UCI has also developed a vehicle use protocol that addresses the sharing of vehicles: [Driving-Vehicles-COVID-19-Precautions.pdf (uci.edu)](https://www.ehs.uci.edu/public-health/covid-19/cleanin.html)

PPE controls in place:

- Based on the hazard assessments conducted for cleaning activities, appropriate PPE has been recommended and has been provided to custodial employees. Disposable nitrile gloves and face coverings are required to be worn when performing cleaning activities.
7. **Keep potentially exposed employees away from the workplace**

Potentially exposed and positive employees are not allowed to return to work based on set criteria from the Center for Occupational and Environmental Health (COEH).

A COVID-19 positive case may return to work when any of the following occur:

For employees with symptoms, all of these conditions must be met:

- a. At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications;
- b. COVID-19 symptoms have improved; and
- c. At least 10 days have passed since COVID-19 symptoms first appeared

For asymptomatic employees, at least 10 days must have passed since the individual’s first positive COVID-19 test. While a 14-day quarantine is recommended, an exposed employee who does not develop symptoms of COVID-19 may return to work after 10 days since the date of last known exposure.

8. **Multiple and major COVID-19 infections and outbreaks**

Definitions (abbreviated and not exclusive):

- a. “COVID-19 case” is a person who has a confirmed positive case, is subject to an order to isolate, or has died as a result of COVID-19.
- b. “COVID-19 exposed workplace” is a worksite or work area location the COVID-19 case used or accessed during the high-risk exposure period.
- c. “COVID-19 exposure” means physical or close contact with a COVID-19 case (greater than or equal to 15 minutes cumulatively over a 24-hour period and within 6 feet).
- d. “Minor Outbreak” means 3 or more cases in an exposed workplace within a 14-day rolling period and continues until there are 0 cases for 14 days. Epidemiology links are now included per [CDPH guidance](https://www.cdph.ca.gov/Programs/Codirec/Covid19/PracticeGuidelines/Documents/2022-09-20_Episode sheet_v2.pdf).
- e. “Major Outbreak” means 20 or more cases in an exposed workplace within a 30-day period and continues until there are 0 cases for 14 days.

Notifications for minor outbreaks apply to campus non-health care workers, students, staff, faculty/academics, and employees of contractors who worked at the exposed workplace during the infectious period of the outbreak. These employees do not need to have been exposed to be notified.

**As a result of a minor outbreak**, Contact Tracing will notify Orange County Health Care Authority (OCHCA) within 48 hours. The notice requires the same information as would be required in an incident report in a Cal/OSHA 300 injury and illness log (names, number, occupation, and worksite), unless the information is inapplicable or unknown. Contact Tracing will also provide a list of the exposed work locations to Human Resources and exposure periods, if relevant. HR will contact departmental HR representatives (i.e. Campus Personnel Officers (CPOs)) with instructions to provide all names to Coronavirus Response Center (CRC) to schedule immediate testing. The +7 day requirement for testing will be automatically implemented due to required weekly asymptomatic testing for all essential on-site employees.
Roles and Responsibilities:

a. Contact Tracing and COEH follow-up with employees per normal process if they test positive as a result of the asymptomatic outbreak testing.

b. EHS will investigate the outbreak and implement any necessary corrective actions, including potential stoppage of operations until corrections are made. This investigation and review will be documented and updated every thirty days if the outbreak continues.

c. Contact Tracing will continue to monitor until there are no new COVID-19 cases detected in the workplace for 14 days, and inform HR when the period has been cleared. Contact Tracing will maintain these records for five years based on UCOP policy.

Notifications for major outbreaks apply to campus non-healthcare workers including students, staff, faculty/academics, employees of subcontractors who worked at the exposed workplace during the infectious period of the outbreak (they do not need to have been exposed).

Contact Tracing will also provide a list of the exposed work locations and infectious periods to Human Resources. HR works with departmental HR representatives (i.e. Campus Personnel Officers (CPOs)) to collect information from supervisors who manage the work locations during the infectious periods (list of employee names who worked, UCInetID, email, preferred contact #).

- Human Resources provides the supervisor with a bilingual template (i.e. C19 AB 685 Notification Bilingual) and asks them to email all impacted staff for immediate testing.
- Human Resources provides the employee contact list to the Coronavirus Response Center.
- The Coronavirus Response Center will contact employees using bilingual scripts (i.e. C19 AB 685 Outbreak Notification Phone Script Bilingual). When there is a list of more than 50 individuals, the Coronavirus Response Center will prioritize Spanish speakers first.
- The Coronavirus Response Center maintains documentation for 5 years, per records and retention policy. Follow-up testing is not necessary since weekly asymptomatic testing for all essential onsite staff has been implemented.

As a result of a major outbreak, Contact Tracing will notify Orange County Health Care Authority (OCHCA) within 48 hours. The notice requires the same information as would be required in an incident report in a Cal/OSHA 300 injury and illness log (names, number, occupation, and worksite), unless the information is inapplicable or unknown.

Roles and Responsibilities:

a. Contact Tracing will also provide a list of the exposed work locations to HR and exposure periods if relevant. HR will contact departmental HR representatives (i.e. CPOs) with instructions to provide all names to the Coronavirus Response Center to schedule biweekly testing.

b. Contact Tracing and COEH will follow up with employees if they test positive as a result of the asymptomatic outbreak testing.
c. EHS will investigate the outbreak and implement any necessary corrective actions, including potential stoppage of operations until corrections are made. This investigation and review will be documented and updated every thirty days if the outbreak continues.

Contact Tracing will continue to monitor the outbreak until there are no new COVID-19 cases detected in the workplace for 14 days, and inform HR when the period has been cleared. Contact Tracing will maintain documentation for up to 5 years, based on UCOP policy.

9. COVID-19 prevention practices and documentation for employer-provided housing

UCI has provided COVID-19 prevention practices and standard cleaning protocols and documents for University-provided Housing in the table below:

<table>
<thead>
<tr>
<th>Location</th>
<th>Contact Name</th>
<th>Contact Information</th>
<th>Cleaning methods</th>
</tr>
</thead>
</table>
| Tierney House                                 | Primary: Alice Mastrianni  
Back-Up: Thu Pham | Mastrian@uci.edu; Thu.Pham@uci.edu; (949) 8249553 | Since March 2019, all cleaning has been completed by the Chancellor and Dr. Ruskin-Gillman. Standard cleaning operating procedures have been developed in case of potential exposure. |
| Student Housing for RAs and HAs in Individual Housing Complexes | Various           |                         | Student Housing cleaning guidelines apply to Resident Assistants (RAs) and Housing Assistants (HAs) working and living in Student Housing facilities. Cleaning protocols are in place in case of an exposure. |
| Anza-Borrego Desert Research Center           | Primary: Jim Dice  
Back-Up: Elaine Tulving | DiceJ@uci.edu; Stulving@uci.edu; (760) 767-1010 | Cleaning is completed by the visiting/overnight employees and facility staff clean areas daily. Cleaning supplies are provided for any potential COVID-19 exposure. These sites use UCI’s Working Well Symptom Checker email to report symptoms. Any staff visiting the site and staying overnight are provided a COVID-19 control measures checklist. Additionally, the site uses a COVID-19 standard operating cleaning document. |
| Burns Pinon Ridge Reserve                     | Megan Lulow        | MLulow@uci.edu; (949) 500-8754 | Cleaning is completed by the visiting/overnight employees and facility staff clean areas daily. Cleaning supplies are provided for any potential COVID-19 exposure. These sites use UCI’s Working Well Symptom Checker email to report symptoms. Any staff visiting the site and staying overnight are provided a COVID-19 control measures checklist. Additionally, the site uses a COVID-19 standard operating cleaning document. |
10. **Employer-provided transportation to and from work**
Vanpool/carpool services are provided by Enterprise and Orange County Transportation Authority (OCTA) and not by UCI. Associated Students of UCI (ASUCI) shuttle services does not provide transportation to employees. All shuttle services to and from the Medical Center have been suspended. Cleaning and disinfecting practices and training are in place for employees driving vehicles in ASUCI and in Fleet Services.
